

# Energy & Mining

*Comprehensive solutions for oil, gas, chemical and mining pipelines.*

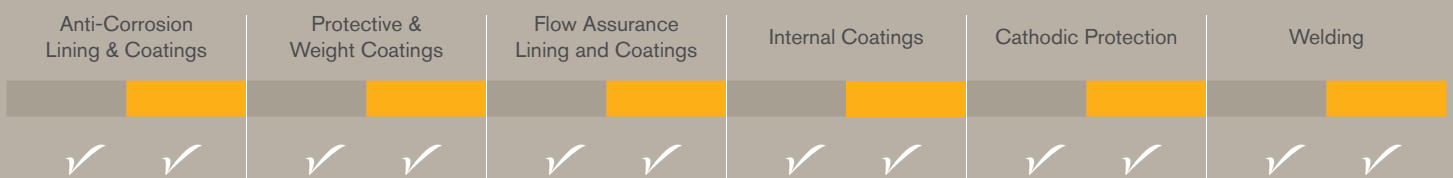

**Insituform**<sup>®</sup>  
Global Pipeline Protection<sup>®</sup>

# Energy & Mining

Insituform now provides comprehensive corrosion protection and pipeline rehabilitation services for the energy and mining market.

Our execution capabilities and technology platform is unrivaled in the industry. We provide solutions for the needs of pipelines throughout their life cycle — from coatings and lining products to cathodic protection to full rehabilitation of the pipe when necessary.

## Energy & Mining Execution and Technology Platform

## United Pipeline Systems

United Pipeline Systems is the global leader in providing high-density polyethylene (HDPE) lining systems for internal pipeline protection. United has constructed and internally lined more than 13,000 kilometers (8,000 miles) of pipelines on six continents since 1985.

United developed the Tite Liner® system, a technology that enables an HDPE liner to fit tightly inside a host pipe. The Tite Liner® system protects steel pipelines from a variety of chemicals and abrasives through a broad range of temperatures and pressures. It is an efficient and cost-effective way to protect new or existing pipelines, and its use can often extend the life of a pipeline far beyond the expected life of an asset.

With office facilities in the USA, Canada, Mexico, Chile and Brazil, United can respond quickly with the specialized personnel, equipment and material resources necessary to complete turnkey projects anywhere in the world.

## The Bayou Companies, LLC

With the premier deepwater coating, insulation and prefabrication facility on the Gulf Coast, The Bayou Companies, LLC has provided services to the oil and gas pipeline industry for over 65 years.

Bayou's services include the industry standard fusion bond epoxy (FBE) coatings, complex deepwater insulations, steel catenary riser (SCR) welding capabilities and quad joint fabrication. Benefits of Bayou's coatings include the improved flow of gas through the pipeline, increased negative buoyancy for offshore pipelines, river or road crossing applications, higher efficient operations of subsea flowlines at depths of 3,000 feet or more and fortified abrasion and moisture resistance.

Its main facility in New Iberia, Louisiana provides access to multiple barge, rail and truck loading/unloading facilities which complement onshore, offshore and the most challenging deepwater projects.

## Corrpro Companies, Inc.

For over 25 years, Corrpro Companies, Inc. has been a leading provider of cathodic protection systems and engineering services in North America. Corrpro offers corrosion solutions for every industrial market including pipeline, refinery, above ground and underground storage tanks, water, wastewater, concrete, infrastructure, offshore and marine.

Corrpro strives to provide high quality cathodic protection materials and cost-effective services including engineering, pipeline integrity, construction and coating inspection.

Corrpro has more than 30 facilities and warehouses worldwide.

## Insituform Technologies, Inc.

Insituform Technologies Inc. is a leading worldwide provider of proprietary technologies and services for rehabilitating sewer, water and other underground piping systems without digging or disruption and corrosion protection of industrial pipelines. Insituform takes pride in its products and services as a sole-source provider of trenchless rehabilitation technologies. As a vertically integrated company, Insituform also offers accountability and ISO 9000 certification.

Insituform provides cost-effective solutions to remediate operational, health, regulatory and environmental problems resulting from aging and deteriorating pipelines.
